

Piano Nazionale Industria 4.0

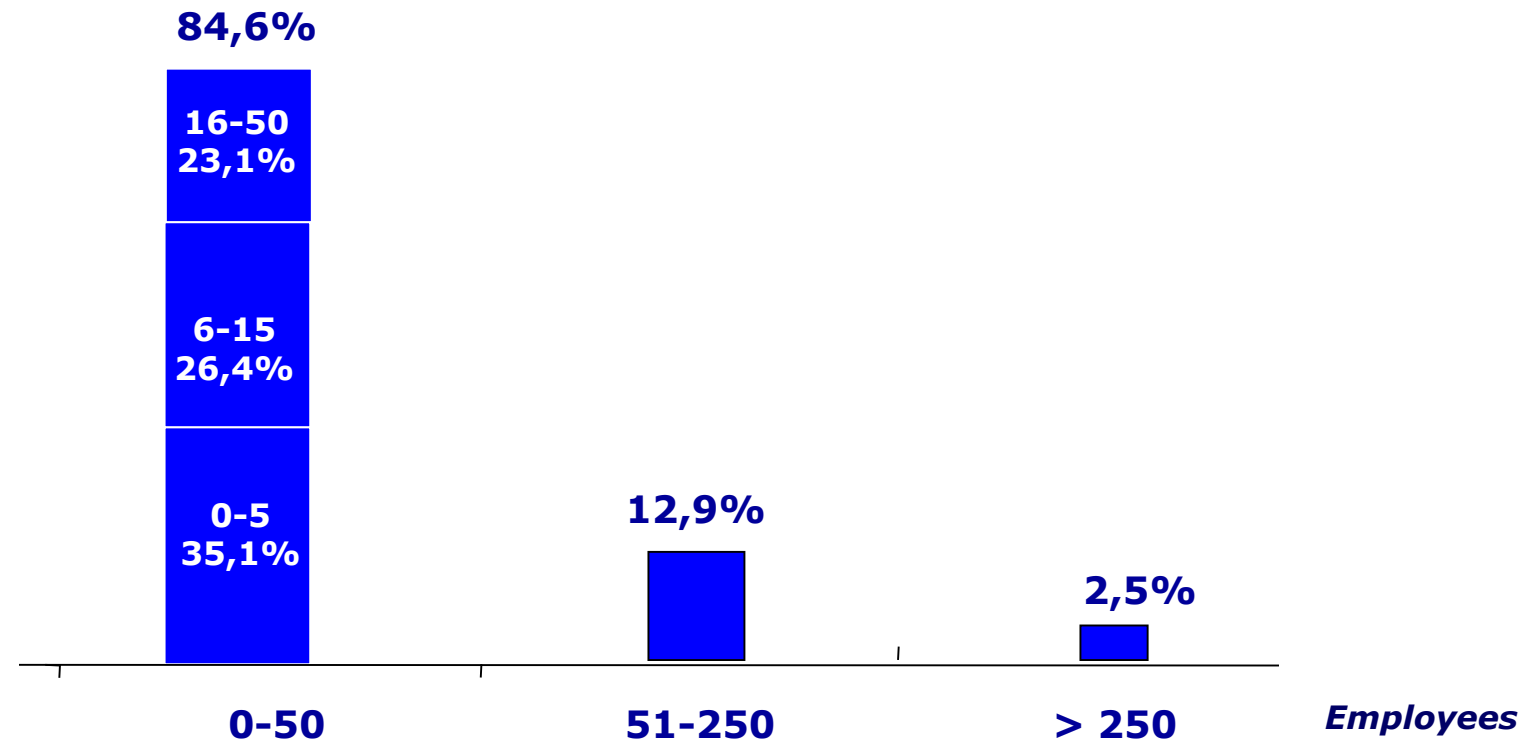

Architectures

Franco Deregibus – Comau and Digital Innovation Hub Piemonte

- Increase the awareness on **Digital Transformation**, driving and supporting companies
- Facilitate the access of companies to the network of **Local Innovation Agents** and to the network of **National and International Competence Centers**
- Support companies in accessing **Public and Private Funding** tools
- **Mentor and Support** companies in the Transformation process
- Support the understanding and implementation of **Piano Industria 4.0**
- Develop and support **Technology Transfer** and the interaction between demand and supply of Digital Transformation Services

Companies by size (Year 2015)

Source: Registro imprese

- Many companies have limited internal IT competencies
- High number of available vendors for low profile ERP's, often with a regional scope
- Limited availability of “integration” suppliers
- Obsolescence of installed equipment

- Modularity
- Encapsulation
- Open source
- Stepwise implementation
