Smart Cities Ecosystems

The Digit Group (TDG) plans, designs, builds, and manufactures holistic smart cities, using technology solutions as the basis of its designs. From the tallest of buildings to the smallest of villages, TDG creates smart cities solutions that provide greater security, increased safety, lower energy use, more efficient water management, safe and comfortable transportation, and a better urban experience. Its smart cities solutions have been implemented in China, Southeast Asia, India, the Middle East, Europe, and throughout the U.S. TDG discovers innovations, mixes these innovations together like ingredients, to create unique experiences, like recipes, for both greenfield Smart Cities and existing urban environments.

Art of the Possible

Smart Cities Development

Innovative, High Performance Urban Environments

Smart Cities Guiding Principles

1. Energy
2. Information Communications Technology (ICT)
3. Transportation
4. Public Safety & Security
5. Green / Sustainable Buildings
6. Water
7. Waste
8. Education
9. Healthcare
10. Citizen Services

A Smart City is not a marketing campaign, a slick sales technique nor an amusing political catch phrase.

It is a series of solutions to a serious and urgent situation the world faces today.

Smart Cities are emerging as a civic action due to a “perfect storm” of the convergence of market conditions, technology innovation, social wants and government needs and the migration to urban environments that has accelerated on a global scale that dwarfs any previous mass movement of people in history.

United Nations Sustainable Development Goals

1 NO POVERTY Icon of a family consisting of two adults and two children.	2 ZERO HUNGER Icon of a bowl with steam rising from it, representing food.	3 GOOD HEALTH AND WELL-BEING Icon of a heart with a pulse line, representing health.	4 QUALITY EDUCATION Icon of an open book and a pencil, representing education.	5 GENDER EQUALITY Icon of a female symbol with an equals sign inside, representing gender equality.	6 CLEAN WATER AND SANITATION Icon of a water tap with a single drop of water, representing clean water.
7 AFFORDABLE AND CLEAN ENERGY Icon of a sun with a power button symbol in the center, representing clean energy.	8 DECENT WORK AND ECONOMIC GROWTH Icon of a bar chart with an upward-pointing arrow, representing economic growth.	9 INDUSTRY, INNOVATION AND INFRASTRUCTURE Icon of three stacked cubes, representing industry and infrastructure.	10 REDUCED INEQUALITIES Icon of an equals sign inside a circle, representing reduced inequalities.	11 SUSTAINABLE CITIES AND COMMUNITIES Icon of several city buildings of varying heights, representing sustainable cities.	12 RESPONSIBLE CONSUMPTION AND PRODUCTION Icon of an infinity symbol, representing responsible consumption and production.
13 CLIMATE ACTION Icon of an eye where the pupil is the Earth, representing climate action.	14 LIFE BELOW WATER Icon of waves and a fish, representing life below water.	15 LIFE ON LAND Icon of a tree and two birds, representing life on land.	16 PEACE, JUSTICE AND STRONG INSTITUTIONS Icon of a dove holding an olive branch and a gavel, representing peace and justice.	17 PARTNERSHIPS FOR THE GOALS Icon of four interlocking circles, representing partnerships for the goals.	The United Nations logo and the text 'SUSTAINABLE DEVELOPMENT GOALS' with a colorful wheel of the 17 goal icons.

Innovation Ecosystems

Kinetic Energy Piezoelectric

**Georgia
Tech**

Piezoelectric is a Kinetic Energy solution that:

- Generates power from compression
- Stores and harvests this power in a Graphene Battery
- Distributes this power through wireless charging
- Captures and reports data of the exact location of the generated power dynamically

Piezoelectric material sits underneath floor finishes like carpet, ceramic tile, wood, etc.

Smart Cities

The Gemini Principles

Purpose:
Must have clear purpose

Public good
Must be used to deliver genuine public benefit in perpetuity

Value creation
Must enable value creation and performance improvement

Insight
Must provide determinable insight into the built environment

Trust:
Must be trustworthy

Security
Must enable security and be secure itself

Openness
Must be as open as possible

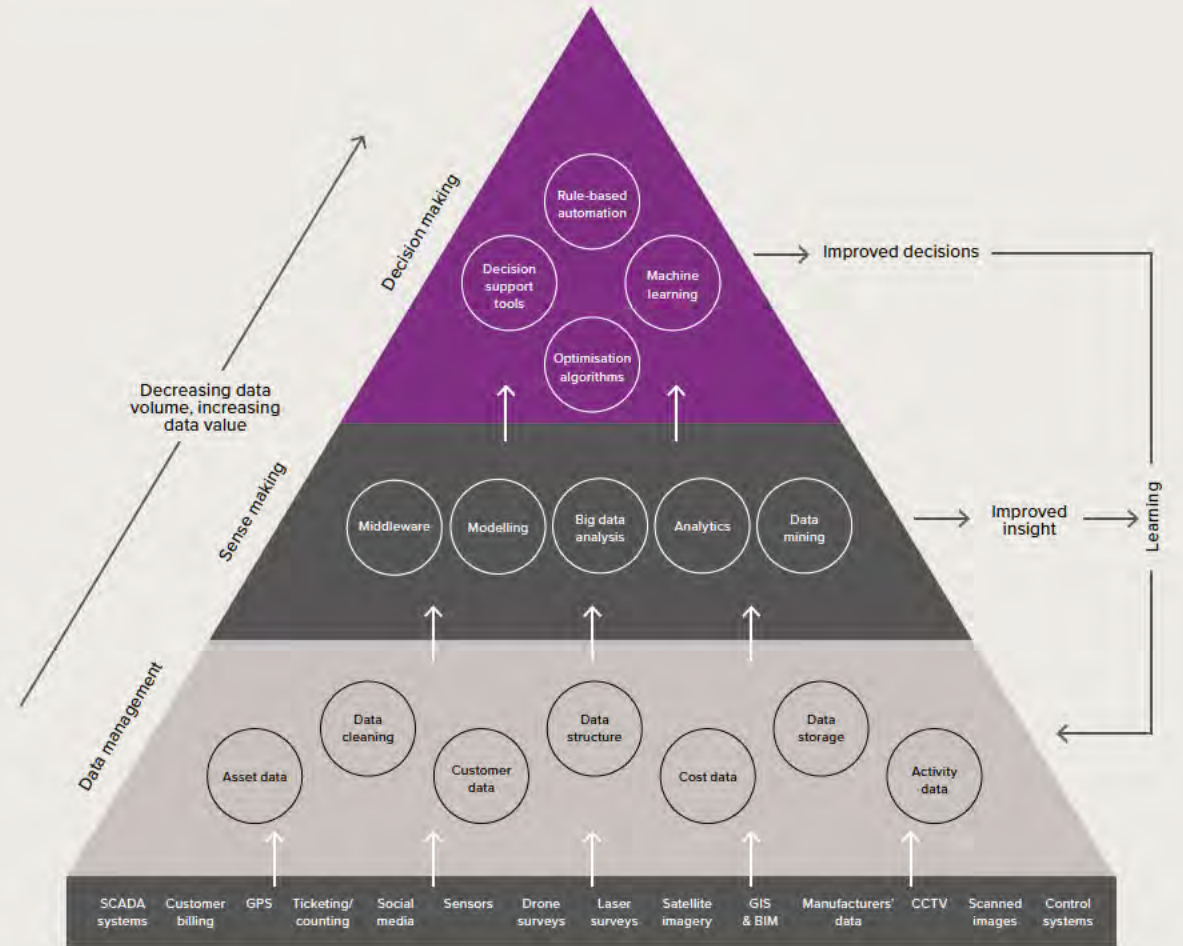

Quality
Must be built on data of an appropriate quality

Function:
Must function effectively

Federation
Must be based on a standard connected environment

Curation
Must have clear ownership, governance and regulation

Evolution
Must be able to adapt as technology and society evolve

Modular Housing Automation

Shanghai, China

Modular Housing

One Home Manufactured Every 7 Minutes

BIM to Fabrication to Installation in one week

Modular Fabrication Factory

Sustainable 2500 square foot house every 7 minutes
with zero defects and zero waste

Competitive Advantages

- Sustainable 250 square meter homes manufactured every 7 minutes with zero defects and minimal waste
- Once at the site, each home is prepared for move in quality in 7 days
- Pre-arranged agreements with local officials streamline the delivery process
- Technology Integration: Technology is built into each home as a 4th Utility with **Amazon's Alexa** being one point of integration.
- House as a Platform: With each house as a computer, TDG Housing technology standardization compliments an array of services to the home owner
- Community as a Network: Each TDG Housing home can be connected like a computer network providing a higher level of safety, security and quality of life, including economies of scale purchasing of products, goods and services

Virtual Reality Industrial Park

Qingdao, China

A woman with dark hair is shown in profile, wearing a VR headset. She is holding a VR controller in her right hand. The background is a textured red surface with five yellow stars, resembling the flag of the People's Republic of China. The lighting is dramatic, with strong highlights and shadows.
